

Growing and Changing – part of our Personal Social Health and Economic Education (PSHE)

Year 4

What your child will be learning about:

Each year in term 5 we will deliver the PSHE topic 'Growing and Changing' incorporated Relationships and Health Education (RHE) which has been designed to cover key skills, attitudes and values children need to explore in order to develop healthy relationships with their peers. Children will also learn how to keep themselves safe and how to ask for help when they need it.

Year 4 topics build on and reinforce the themes of the previous years. New content that will be covered will teach children to recognise and understand conflicting emotions. We will learn how to recognise and understand good and not-so-good feelings. We will also find strategies to deal with change and give examples of safe and unsafe secrets.

Other new topics we will look at include:

Body changes as they approach and move through puberty including menstruation and human reproduction

The children will be able to identify parts of the body that males and females have in common and those that are different, knowing the correct terminology for their genitalia. These lessons will ensure that the children can understand and explain why puberty happens.

Leading on from the lesson in Year 3 on menstruation, we will teach the children that periods are a normal part of puberty for girls and helped them identify some of the ways to cope better with periods. We will also raise awareness of wet dreams and how some boys can wake up feeling sticky from releasing semen during the night. Self-touch/masturbation will be first introduced in this topic to help children understand about appropriate and inappropriate touch within the boundaries of public and private places.

The children will understand that babies come from the joining of an egg and sperm, but not how this occurs. They will therefore be able to explain why periods occur when an egg doesn't meet a sperm.

Marriage and partnerships

Increasing children's understanding of what is meant by a positive, healthy and loving relationship is an important part of safeguarding their health and wellbeing. Children will look at different kinds of relationships and the values, expectations and responsibilities within healthy, positive relationships. They will understand that relationships can change over time and have explored some ways that changing relationships can be managed, ensuring behaviour is respectful, even when things do change.

Children will learn that marriage is a commitment freely entered into by both people and can include opposite-sex and also same-sex partners. They will learn the legal age for marriage and explore reasons why some adults might choose to be married, live with someone, or have a civil ceremony.

Vocabulary your child will learn:

Puberty, hormones, pubic hair, eggs, sperm, penis, testicles, breasts, ovaries, womb, vagina, vulva, clitoris, labia, menstrual cycle, periods, period pad, period pants, menstrual cup, tampon, civil partnership, forced marriage.

Questions your child may ask at this age:

- When were you allowed to start doing things more independently?
- Did you have to do or prove anything to gain more independence from your parents?
- What products do you use for periods?
- When I start my period, where can I get period products from?
- When did you start puberty?
- How did you feel? Was it bad?
- Is it normal?
- How can I tell someone not to do something that's making me uncomfortable, but without hurting their feelings?
- Have you ever been made to keep a secret when you didn't want to? How did you handle it?
- Why do some grown-ups decide to get married/live together?
